Smart Solutions

## Process Automation

We , at HERCULES, are engaged with products, distributions and project management, catering to various project industries like pharmaceuticals, chemicals, petrochemical, heat treatment, fertilizers industries and cement plant etc.

Also our wide range of products enable us to work on projects in the field of water and waste water, oil, gas, solar, electrical utilities and remote monitoring for any operational entity of enterprise customers.

Typical product range includes...

- ✓ PLC's
- ✓ HMI's
- ✓ AC Drives
- ✓ Field Sensors
- ✓ Signal Conditioners
- ✓ Automation Panels

### Turnkey Projects

Apart from sales and manufacturing we are also taking the mini turnkey projects for various industries in the field of control , power and automation up to erection,commissioning installation and execution.

## Expertise in

### Engineering & Consulting

Engineering and consulting help in improving the performance of production processes. We leverage our network to provide the best solutions for you.

### Industrial Training

- 1) Electrical- 10th or 12th / ITI
- 2) Automation / Control System
- 3) Embedded System

### Installation & Commissioning

We have extensive experience of equipment installation and commissioning projects across the world.

### Maintenance

Our maintenance services always include repairs authorized by the manufacturer and we refurbish the equipment to correspond to the original

## Power & Control Panel

- ✓ Main LT panels upto 6400A
- ✓ PCC, PDB, ACDB, DCDB/LDB etc.
- ✓ MCC, PMCC ,APFC , AMF, etc
- ✓ ADFC, Chiller, Damper Control, PLC, Drive Panels etc.

## Enclosure

- ✓ Free-Standing Enclosure
- ✓ Wall-Mount Enclosure
- ✓ Floor-Mount Enclosure

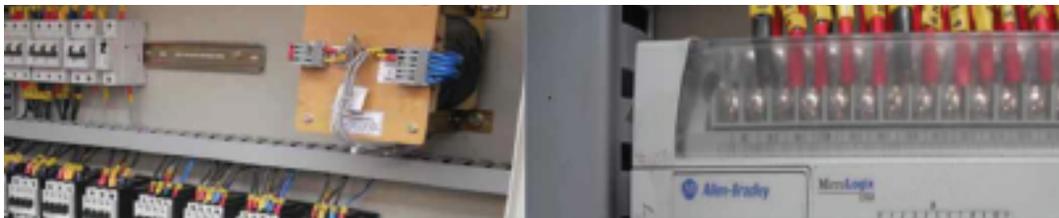

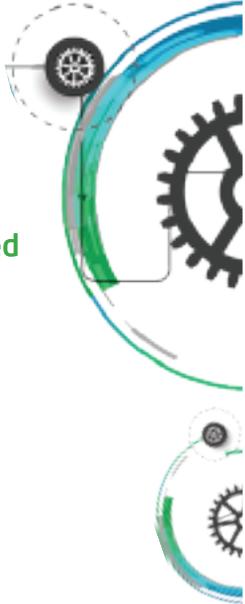

## Energy Management

Utilities need greater visibility and operational control of transmission and sub -transmission networks as well as reduced EMS implementation costs. Energy Management System is a suite of energy management software tools used to monitor, control and optimize the performance of generation and transmission systems. It reduce energy consumption, improve the utilization of the system, increase reliability and predict electrical performance as well as optimize energy usage to reduce cost.

Smart Panel switchboards make it possible to:

- ✓ Analyse energy consumption and optimise costs
- ✓ Prepare for energy audits
- ✓ Handle daily electrical challenges as well as plan for the long term
- ✓ Improve power supply reliability for occupants

## Quality driven, Customer focused

A well-established organisation, we have flourished into a dynamic and prosperous engineering enterprise; enjoying an enviable reputation of working to high engineering standards and to a level of quality that is second to none.

We are well known for designing, manufacturing and installing control and distribution panels for a wide range of applications, we offer a truly personal and professional service to our clients

### Vision

To be a responsible corporate organization for nurturing human values and contribute towards conservation of energy.
